

ABSTRACT:

The present invention provides a hard gelatine capsule containing a pharmaceutical
5 composition comprising cyclosporin A in a mixture with a surfactant of HLB value at
least 10, substantially free of any oil and when a hydrophilic phase is present, the
hydrophilic phase being a polyethylene glycol and/or a lower alkanol provided that any
lower alkanol present is present in less than 12% of the total weight of the composition
absent the hard gelatine capsule.
